

YOW Canada Inc. offers quality health and safety training online

Over the years, YOW Canada has become a popular choice to train students before they enter the work force. Our online health and safety courses provide them with an edge over other job applicants.

Established in 2001, YOW Canada Inc. provides high quality occupational health and safety training and materials to aid Canadians with safety compliance. Over the years, we've trained tens of thousands of people across Canada!

Our online courses are available 24/7, coast to coast. Having provided training to many students in high schools, colleges and universities, YOW Canada has become a popular choice to train undergraduates before they enter the work force. Our online health and safety courses give them critical knowledge needed in the work place, providing them with an edge over other job applicants.

All of our online courses include audio, animations, videos, illustrations and interactive exercises. They are convenient, effective and easy to use. Also, a training certificate is issued upon successful completion of a course which can be added to a resume.

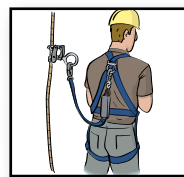

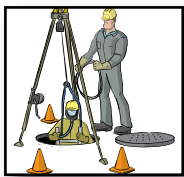

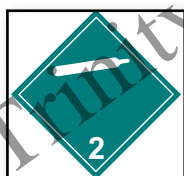

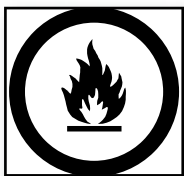

If you have a number of people to train, we offer many implementation options and work with you to develop the best suitable solution for your organization.

Also, with access to a Course Administration site, you don't lose track of your trainees! You can login to this site at any time to view all trainees and the courses they are registered for, check their status, review answers to tests, view and print certificates, activate new accounts, view or email the password list, track certification dates, assign groups, and send email notifications and reminders to your trainees.

Ensure your employees are up-to-date and in compliance with YOW Canada's online health and safety courses.
