## Enhance your Career with AGAT Laboratories

**A** GAT Laboratories is a highly specialized, Canadian-based company that provides analytical laboratory services world-wide. Our scientists are highly skilled and specialized in the fields of chemistry, biochemistry, microbiology, geology, engineering and specialty analysis. AGAT Laboratories' operations encompass 12 scientific divisions to offer full-service solutions to multiple industry types within the Environmental, Energy, Mining, Industrial and Health & Safety Sectors.

AGAT Laboratories specializes in the following scientific areas:

- Environmental
- Ultra-trace Toxicology
- Agriculture
- Food Testing Services
- Geology and Petrology
- Reservoir Engineering
- Air Quality Monitoring
- Oil and Gas Chemistry
- Oilsands Analysis
- Routine Core
- Mining Geochemistry
- Tribology (Preventative Maintenance)

Our company offers the highest level of professional ethics and integrity to our clients. This extensive list of services comes from the diversity of professions available at AGAT Laboratories. Our employees range from experts in the fields of science working in our laboratories to business representatives who manage the client-company relationships. Employees have the opportunity for continuous personal and professional growth through on-going training and education. Our company prides itself in its involvement and active participation in environmental, professional, political and charitable events and organizations and employees get the opportunity to take part in these developing initiatives.

### A Unique Work Environment

At AGAT Laboratories, our corporate team offers our clients strong background knowledge of analytical operations in order to act as a key link between clients and the laboratory. Each individual is highly trained with an in-depth understanding of the clientele's needs. As a result, we deliver the highest quality of service to our clients. With a wide array of positions available, AGAT Laboratories is looking for new graduates like you to grow our company in innovative and forward-thinking ways to remain at the forefront of our industry.

Our technical professionals are members of important industry associations. These memberships and affiliations include the Canadian School of Hydrocarbon Measurement

(CSHM), Petroleum Technical Alliance of Canada (PTAC) and the Industry Measurement Group (IMG). Involvement in these organizations and other industry groups assist AGAT Laboratories' Research and Development Program in creating innovative technical solutions and improved services for several different sectors.

AGAT Laboratories has a long history of developing leading-edge technology and equipment to provide premium quality laboratory analysis to clients. We employ a scientific team dedicated to research and development and improvement initiatives.

Continuous advancement is of the utmost importance to AGAT Laboratories and all employees strive to develop new initiatives that can continue to enhance our performance as a company. We utilize client feedback and communication to help us discover innovative ways to increase our services and client efficiency. Large-scale, client-focused initiatives have been developed throughout our Divisions as a result.

AGAT Laboratories has strategically positioned branch locations across Canada to service key areas. All of our laboratories house the most modern and state-of-the-art technology available in the laboratory industry. AGAT Laboratories has also built long standing relationships and alliances with hundreds of depot locations across Canada. This allows us the ability to offer clients sample pick-up and drop-off locations in any area of operation. Our list of depot locations is constantly evolving to ensure our clients are offered the best possible service in all areas of operation.

AGAT Laboratories' network of laboratory locations provides clients with cost-effective and timely analysis in which the most up-to-date technical standards are met. AGAT Laboratories is proud to set the standard for the laboratory industry, ensuring validity and accuracy of methodologies through our extensive Quality Assurance and Quality Control programs.

With world-class facilities and state-of-the-art instrumentation, our qualified personnel adhere to AGAT Laboratories' mission statement, delivering "Service Beyond Analysis".

Recent expansions across Western Canada including; Fort McMurray, Calgary, Terrace, Edmonton, Vancouver, Kelowna and Whitehorse has developed a number of new employment opportunities in the region. Proud of our Canadian heritage, we seek to support the Canadian economy through job creation for workers in local communities.
