

Centre for Arts and Technology

If you're convinced that your dream career working in one of the many and varied digital arts industries is nothing more than a dream then you couldn't be more wrong.

The film, audio and video game industries alone are worth billions and grow exponentially through one medium or another every year. The chance to realize and shoot for your dream in the areas of arts, entertainment and technology has never been at a higher peak than it is today. How do students get started in these industries? The first step is always education.

The Centre for Arts and Technology diploma programs prepare students for careers in 3D Animation, Digital Filmmaking, Digital Photography, Audio Engineering, Event and Promotions Management, Graphic and Digital Media Design, 3D Game Animation, Interior Design, Fashion Design, Network Security and other emerging entertainment industry and information technology careers.

The Centre consists of three Canadian college campuses connected virtually by leading edge teleconferencing systems. Our campus locations operate in the unique and distinctive Canadian locations of Kelowna, Halifax and Fredericton. The Centre for Arts

and Technology is highly respected and provides a unique educational experience that draws on the talent and resources of industry professionals from coast to coast.

The Centre has pioneered education in Digital Media and Entertainment Technology in Canada and was one of the first education teams to develop programs in Digital Audio, Arts and Animation, Video Game Design and Development, Motion Design, Interactive Arts for the Web, Surround Sound, Sound Design, Digital Recording Arts, and other leading edge tools and technology.

We want prospective students to be certain they're making the right career decision by coming to one of our schools.

With that in mind we offer the opportunity to visit any of our campuses, whether it's just a drop in visit to tour the facilities or a job shadow where you can sit in on a class. If you're still in secondary school and looking for something more intense try out our Digital Bootcamp which runs every March and allows students to visit our campus for several days and take part in specially designed workshops. Contact anyone of our campuses to find out how you can start your digital arts career today! ♦
