# MAKE OUR MISSION

– to protect people and the environment –

# YOURS.

World-Class Technical Experts  
Regulation and Safety  
Strategic Management

There is no other agency in the Federal government like the U.S. Nuclear Regulatory Commission (NRC). We are a focal point of regulation, solutions, oversight, and stewardship for national and global issues of the day in technology, research, energy policy, environmental initiatives, and beyond.

Our mission is to regulate the Nation's civilian use of byproduct, source, and special nuclear materials to ensure adequate protection of the public health and safety, to promote the common defense and security, and to protect the environment.

For all our technical and scientific expertise however, the NRC is first and foremost a team of some of today's most brilliant minds and subject matter experts. We are a diverse group representing various ethnic backgrounds, cultures, educational credentials, and experiences — all sharing a keen interest in public service and in the interplay between science, technology, and policymaking.

Joining the NRC means making a conscious decision to pursue a career unlike any other in the public and private sectors. We invite you to connect with us by visiting our Web site. Explore careers, learn more about our mission and our work, avail yourself of our online career announcement and application system by visiting <http://www.nrc.gov/about-nrc/employment.html>.

The NRC is consistently ranked as one of "The Best Places To Work In The Federal Government."\*\*

\*\*According to the Partnership for Public Service and American University's Institute for the Study of Public Policy Implementation (ISPP). [www.bestplacetowork.org](http://www.bestplacetowork.org)

An equal opportunity employer, M/F/D/V. U.S. citizenship required.
