

Why become a stylist?

Are you creative? Have you always been interested in style and design? Do you enjoy meeting new people?

If these things apply to you, you may be interested in the beauty industry! It is one of the most exciting, challenging and rewarding careers that you could have, and with so many options available, you'll never get bored.

You may want to pursue the nails, facial, make-up route and become an Esthetician. You could become an instructor or owner of a cosmetology school, a platform artist on stage showing all the latest haircuts, or a color or perm technician training other stylists.

The industry needs distributor/sales consultants to supply all the products and tools for the stylists. Magazine companies need writers/editors for their beauty and fashion articles.

Or you may eventually decide to become a stylist with a modeling agency, movie/theatre company, or even a cruise-ship line.

With all the advancements in science and technology, who knows what other career opportunities may be on the horizon!

There is no such thing as "seniority" in this business. If you work hard and build your clientele it will be directly reflected on your paycheck at the end of the month. It does not matter if you have been in the business for two years or 20 years.

Cosmetology is a career that you can "take with you" nearly anywhere in the world. Often the hours can be flexible and a salon can be set up in the home to accommodate raising a family.

Get a **HEAD START** in the beauty industry! When you dream about a fun, fulfilling, and exciting career, Masters School Of Hair Design can put you there. Beauty starts here ... Why don't you? ♦
