

the complete package

Using multiple companies on a multi service project is old school

Since 1992, our goal has been to provide clients with a simplified way to deal with the cleanup of property. Keeping the 'simple' concept in mind, we decided to create a one-stop-shop where clients could go and have all aspects of their project managed from start to finish – one contact and one contract.

To offer this, we strategically expanded our service offering to include demolition, 24/7 emergency response, environmental remediation, hazardous material abatement, metal recycling, training and waste management.

These specialized services enable QMLP to seamlessly move from one stage of a project to the next, even when multiple services are required simultaneously. Our clients have the ease of dealing with one expert who manages the entire project and ensures it is completed safely, on time and on budget.

- DEMOLITION
- EMERGENCY RESPONSE
- ENVIRONMENTAL REMEDIATION
- HAZARDOUS MATERIALS ABATEMENT
- METAL RECYCLING
- TRAINING
- WASTE MANAGEMENT
